

SOURABH CHAVAN

Software Tester | QA Automation Engineer

+91 8766797997 | sourabhchavan2317@gmail.com | Pune, Maharashtra | [LinkedIn](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Software Tester with hands-on experience in Manual and Automation Testing using Playwright, Appium, and TypeScript across web, Android, and iOS platforms. Skilled in building cross-platform automation frameworks, complex data/UI validation, and CI/CD-integrated test execution. Strong understanding of SDLC, STLC, defect lifecycle management, and Agile methodologies. Experienced in leveraging AI tools (GitHub Copilot, ChatGPT) for automation scripting, boundary-value test generation, and debugging to accelerate release cycles. Test case documentation and automation code samples available in portfolio (linked above).

TECHNICAL SKILLS

Testing Skills

- **Core Testing:** Manual Testing, Test Planning, Test Case Design, Test Strategy
- **Testing Types:** Functional, Regression, Smoke, Load, UI/UX, End-to-End Testing
- **Coverage:** Cross-Browser & Cross-Platform Testing
- **Defect Management:** Full lifecycle tracking in JIRA and Azure DevOps
- **Process & Methodology:** SDLC, STLC, Agile Testing

Automation Skills

- **Framework Design:** Page Object Model (POM) using Playwright, Appium, Selenium
- **Cross-Platform Scripting:** Unified Web + Android + iOS scripts within a single execution suite
- **Execution & Config:** Multi-Environment (.env) Execution, Scheduled Test Runs
- **Data & UI Validation:** Tables, Graphs, Calendars, PDFs, Excel, CSV
- **Reliability:** Failure Handling & Automated Cleanup Mechanisms
- **Languages:** TypeScript, Java

Performance Testing

- JMeter (Load & Stress Testing)

AI Tools

- GitHub Copilot, ChatGPT — AI-Assisted Scripting, Boundary-Value Test Data Generation, Debugging

PROFESSIONAL EXPERIENCE

Softtestlab Technologies, Pune — Pune, Maharashtra (Office) | Nov 2025 – Present

Software Tester

Intern (Nov 2025 – May 2026) → Full-Time

- Execute manual and automated test cases across enterprise web and mobile applications each sprint, catching defects early and keeping releases on schedule.
- Designed test plans, test scenarios, and test data directly from business requirements, improving requirement-to-test traceability.
- Executed functional, regression, smoke, and retesting cycles each release to maintain application quality across sprints.
- Engineered and maintained automation scripts using Playwright and Appium with TypeScript, reducing manual regression execution effort.
- Identified, documented, and tracked defects through full lifecycle in JIRA and Azure DevOps, coordinating fixes with developers.
- Applied AI tools to accelerate automation script development, troubleshooting, and test data generation.
- Collaborated with developers, business analysts, and QA teams in Agile sprints to ensure STLC compliance.

- Supported manual testing efforts for enterprise applications, contributing to test case design and execution under senior QA guidance.
- Gained hands-on exposure to Playwright and Appium automation frameworks and the full defect lifecycle.

KEY PROJECTS

Enterprise Funeral Management Suite (Web Portal + iOS Apps + TV Application)

- Designed and executed 300+ test cases across 10+ modules spanning web, iOS, and TV platforms, covering customer profiles, digital registries, invoicing, and billing workflows.
- Tested payment and billing module across the multi-client admin platform, validating cost calculations, invoicing logic, and client-specific pricing rules.
- Tested system analytics dashboards for real-time reporting and data insights, and verified real-time data synchronization across web, mobile, and TV platforms.
- Verified offline data handling within the mobile apps, including local data storage, backup, and offline-to-online sync scenarios, with database file verification to confirm data integrity across backup and restore cycles.
- Tested app update flows to ensure data consistency and feature stability across version upgrades.
- Automated 10+ complete end-to-end flows using Playwright, including CSV data handling and PDF extraction/validation, cutting manual regression effort per sprint cycle and covering core user journeys.

Senior Care House Facility Application (Role-Based Web Portals + Mobile Apps)

- Designed and executed 400+ test cases across 12+ modules covering role-based access and permissions for Admin, Staff, and Resident user roles.
- Built 200+ end-to-end automated tests spanning web, Android, and iOS, including cross-platform validation.
- Tested system analytics tabs for accurate reporting and data visualization.
- Performed statistical verification and analytics tab testing, both manual and automated, covering dashboards, graphs, and reporting metrics for data accuracy.
- Validated real-time messaging, push notifications, and emergency alert functionality.
- Used AI-assisted techniques (GitHub Copilot, ChatGPT) to generate boundary-value test scenarios, improving edge-case coverage.

Job Placement & Recruitment Web Application (Role-Based Web Portal)

- Designed and executed 100+ test cases across 7+ modules covering candidate registration, job search, application workflows, and resume upload functionality.
- Verified automated email notifications and application status updates.
- Validated analytics dashboards and recruitment metrics reporting.

EDUCATION

B.Tech. in Computer Science & Information Technology

June 2025

Rajarambapu Institute of Technology, Sangli

CERTIFICATIONS & ACHIEVEMENTS

- Graduate Aptitude Test in Engineering (GATE 2025) — Qualified
- Rubicon Soft Skills Development Certification
- NCETET Research Paper Publication Certificate, Bharathi Vidyapeeth, Kolhapur
- Quantum National Project Competition — Runner Up
